

Enhanced Arrange Functionality for the Container Control

STANDARD ARRANGE

The standard arrange is the current implementation of arrange in which the icons are arranged at the top of the window, starting at the upper left hand corner. The icons will never overlap.

mp2: NULL

GRID ARRANGE

Grid arrange arranges the icons within grid squares according to a predefined pattern.

CMA_RIGHT

CMA_TOP

CMA_BOTTOM

SELECTED SUBSET ARRANGE

The subgroup arrange option allows a subset of the icons to be arranged in a horizontal or vertical orientation. Icons which are not part of the selected subset do not move.
